PREVIOUSLY AT MERRYHAM PALACE

2023 was not a good year at The North Pole. In his first year as Santa, Claus King Shane was facing unprecedented economic struggles. The commercialization of Christmas had crippled the Kingdom's finances, causing preceding Santas to take out loans that now could not be repaid.

With Magic Corp now owning most of The North Pole and Merryham Palace, King Shane Santa Claus tried a last-ditch effort; a telethon to pay off the loans and reset the Kingdom's Economy.

This was not without its struggles though. Family antics proved only to stress the king, but made for good television. By the end of the show, they were no closer to saving Christmas than when they started.

In the last moments The Royal Family asks Magic Corp President why he was so bent on erasing Christmas as we know it, only to find out that the real brains behind the operation was his daughter, Susie Scrooge. Susie, being upset that Santa did not bring her grandfather back, wanted to show The North Pole who's boss and end this disappointing monarchy. Never to be deterred King Shane, His wife Queen Rachel, and His mother Queen Andrea comforted Susie and explained the true meaning of Christmas and family. Our loved ones are always with us.

Thanks to this heart warming moment, the donations came rolling in and Christmas was saved!

THIS YEAR...

It is the dawn of a new Era at The North Pole!

Life is good, economy is growing, and so is the Claus Family! King Shane and Queen Rachel have adopted a brand new Princess, Princess Izzy; Prince Trace has married the love of his life, Chrissy; and Princess Eloise is growing into her duty as the future Santa Claus.

Is Princess Eloise ready though? A ceremony is set to name her the heir to the throne and she has a decision to make. Will Princess Eloise accept her place, or will the line change and Shane's cousin, Prince Eddie, come to power? Join us to find out!
